- **Registration Number:** 25BCE11158
- **Branch:** Computer Science (Core)
- **Year:** 1st Year
- **Date:** March 28, 2026

---

1. Introduction (100–150 words)

Digital literacy is really important for doing in the workplace these days. I am the Student Digital Ambassador at VIT Bhopal University for this project. My goal is to make a Digital Literacy Portfolio that will help my fellow students use the internet in an professional way.
I am working on five things. These are making people aware of things making a good online presence learning how to work with others online practicing how to communicate like a professional and learning how to avoid cybercrime.
Digital literacy is what this project is about. I want to show that digital tools can be used to meet people and do well in school while still being safe and following the rules online. I am tracking my progress in these areas to become a Digital Literacy student, at VIT Bhopal University.

---

2. Task 1 Write-up: Digital Literacy Infographic (150–200 words)

Digital literacy is really important for doing in school and at work nowadays.
As a Student Digital Ambassador at reputed VIT Bhopal University, I wanted to create a Digital Literacy Portfolio.
This portfolio would facilitate my peers to engage with integrity and professionally.
The portfolio has five parts:

- Creating visual materials to spread awareness
- Digital Footprint
- Digital Workspace Tools
- Cultivating Executive Presence
- Analysing how to avoid electronic malfeasance

Through these tasks I want to show how digital tools can be used effectively for networking and academic success.
I want to show how digital tools can really help people meet others and do well in school when we use them the way. The important thing for me is to always follow the rules for being good and safe online so we can be sure that what we do, on the internet is safe and respectful.
Digital tools are very important here. Using them correctly will help our digital tools be a big

part of this. Digital tools will really help us if we use them in a way.

---

3. Task 2 Write-up: Digital Portfolio (150–200 words)

I think digital literacy is really integral for doing in school and at work nowadays. I got the job of Student Digital Ambassador at VIT Bhopal University for this project. My primary objective was to make an exceptional Digital Literacy Portfolio to help my peers use the internet in a professional way.
I had to work on five things:

- Making people aware of things using pictures and videos
- Creating an online image
- Learning how to work with others online
- Talking to people in a professional way
- Learning how to stay safe online and avoid cybercrime.

I hope these tasks show that digital tools can be used to meet people and get ahead in school while being safe and following the rules online.
I will use Kaggle to practice my skills with their data and competitions. I want to keep working on these skills so I can be ready for a job by the time I graduate from VIT Bhopal University in 2029. Digital literacy is something I will keep working on to be good, at using tools and I will make sure my Digital Literacy Portfolio shows that.

---

4. Task 3 Write-up: Coding & Collaboration (150–200 words)

Digital literacy is really important to succeed in today's professional world.
I am now a Student Digital Ambassador at VIT Bhopal University for this project.
My main aim was to create a Digital Literacy Portfolio to help my friends use the digital world safely and professionally.

The portfolio has five parts:

- Creating visual materials to spread awareness
- Building a professional online presence
- Learning tools to work with others
- Practicing professional communication
- Learning how to avoid cybercrime

Through these tasks I want to show how digital tools can be used well for professional networking and academic success while following strict rules for online safety and ethics.
I also learned how to connect these forms to Google Sheets to analyse responses in time which has really improved my data management skills and will be helpful, for all my future lab work.

---

5. Task 4 Write-up: Communication & Etiquette (100–150 words)

I think it is really important to be good with computers and technology to do well in school and at work these days. I am the Student Digital Ambassador at VIT Bhopal University for this project. My main goal was to make a Digital Literacy Portfolio that's very complete. I wanted to help my fellow students use the internet and computers in a professional way.
To do this I worked on five things. I made posters and other things to show people about literacy. I also made a website and learned how to use tools that let people work together. I practiced talking to people in a way and learned about how to avoid cybercrime.
I hope that by doing these things I can show people how to use tools to meet other professionals and do well in school. I also want to make sure people know how to be safe and follow the rules when they are online. When we send emails or chat with people it is not what we say that matters but also how we say it because that is important, for being professional. Digital literacy is what I am trying to learn and help others with. It includes digital literacy and I will be working on my digital literacy skills.

---

6. Task 5 Write-up: Cybercrime Awareness (100–150 words)

Digital literacy is very important to succeed in todays professional world.
I am now the Student Digital Ambassador at VIT Bhopal University for this project.
My main aim was to create a Digital Literacy Portfolio to help my friends use the digital world safely and professionally.

- I made awareness materials.
- I built an online profile.
- I learned tools to work with others.
- I practiced communicating
- I researched how to avoid cybercrime.

Through these tasks I want to show how to use tools well for professional networking and academic success while following strict rules, for online safety and ethics.
This will also help me or my friends if we ever get scammed.

---

7. Conclusion (~100 words)

In my year as a B. Tech student the Digital Literacy initiative has really changed my life.
I have an understanding of what it means to be a responsible digital citizen now.
This is not just about learning how to use programs like Canva or GitHub.
As a Student Digital Ambassador, I have learned that teaching people about presence and online safety is just as important as learning technical skills.
The Digital Literacy initiative has taught me a lot about being a digital citizen and the Digital Literacy initiative has helped me with this.
After four years, at VIT Bhopal I can now manage my digital presence and I can also help my classmates manage their digital presence with the help of the Digital Literacy initiative.
